FOREWORD

No attempt has been made to adjust the estimates so that all reflect the same degree of accuracy. All totals shown in this handbook were obtained by adding data available for individual countries. No new research was undertaken to compensate for gaps in available information.

Since these estimates are provisional and space does not permit many important qualifications, no conclusions or decisions on the basis of the data herein presented should be reached without further consultation with and explanation by the originating offices.

All of the estimates pertaining to commodities and services are production estimates unless designated as "inventory." All data are for 1951 except where otherwise indicated.
